

This programme will equip your child with the strategies he needs for scoring what he wants in GCE 'O' level Additional Math on a weekly basis.

The programme is designed in such a way that your child will see his results in every lesson!

These are just a snapshot of what your child will learn:

- ✓ How to understand abstract Math concepts quickly and easily
- ✓ How to cross - link different related concepts together to see the big picture clearer
- ✓ How to answer to the question by identifying keywords
- ✓ How to manage time effectively to complete questions fast and accurate
- ✓ How to master A-Math confidently through hands on experience and active participation.
- ✓ How to learn new concepts quickly and remember more within the shortest time.
- ✓ How to apply correct strategies correctly in a systematic manner.
- ✓ How to tackle questions with ease by asking the right set of questions . . .

Your child will learn through high impact processes, experiential exercises, focused learning, case studies and accelerated learning techniques all of which are personally trained by Ai Ling, Ong – Top Math Coach with over 10 years of teaching experience in helping students to achieve the breakthrough in their Math results.

Vanessa Lim,
E8 → A2

"A Math used to be such an abstract subject for me. I couldn't make sense of what I was taught and I did not pass any of my A Math exams or tests previously. Joining this A Math Intensive programme was turning point for me; I wish I was taught the strategies earlier! They were simple and easy to use as I learnt how to "see" A Math better. Thanks for the belief in me!

Using what your child will learn during the Ultimate Leap Programme, he will not only be equipped with the proven toolset to easily and effectively produce the results he wants in A-Math but also the winner's mindset to cope with any challenges.
